PETERMAN'S DISCOVERY FOR BUGS

The experienced cook knows that in the ordinary range the oven has "cold corners" and "scorching spots"; in other words it is not heated uniformly at all points. In the Crawford the heat from the fire is carried around the oven by specially designed heat flues in such a way as to heat it in all parts alike. That is one reason why the Crawford Oven bakes better than others.

The perfect control of the fire afforded by the patented Single Damper together with these scientific heat flues

make the Crawford Range a better baker than any other. Then there is the Ash Hod instead of that old kitchen I nuisance, the clumsy ash pan. FOR SALE BY M. HOURIGAN,
